

Let's Create a Science Museum

In this project which we will do by making students curious about science includes the lives and studies of scientists, as well as science-related experiments, materials, board, mind maps, pictures, posters, videos, puzzle, e-magazine, e-newspaper, virtual museum, animation, games etc., a joint product will be obtained. We will also emphasize how important Science is in finding a cure for the Covid-19 virus.

Ülkemizden 9, Romanya' dan 2 öğretmenimiz ve öğrencilerimizden oluşan projede bilime, dair her konuda merak uyandırarak ve bilim insanlarının hayatları ,çalışmaları, bilimle ilgili deneyler, materyaller, pano, zihin haritaları, resim, afiş, videolar, puzzle, e-dergi,e-gazete, sanal müze, animasyon, oyunlar vb. etkinlikler yapılarak ortaklaşa bir ürün elde edilecektir. Proje dilinin İngilizce olması sayesinde öğrenciler yabancı dillerini geliştirecek, farklı okullardaki ve ülkelerdeki arkadaşlarıyla ortak etkinlikler yapma fırsatı bulacaklardır.

Projede ayrıca Covid-19 virüsünün tedavisinde bilimin ne kadar önemli olduğu vurgulanacaktır.

Öğrencilerimizin ortaklarımızla birlikte yaptıkları çalışmalardan örnekler:

**FEBRUARY 4th IS
WORLD CANCER DAY!**

According to a news recognized in TRT NEWS, Head of Cancer Department of the Ministry of Health, Murat Türkyılmaz said, "When we look at the cancer, 90-95% of it is environmental factors, 5-10% is genetic factors. Especially, using tobacco and tobacco products, obesity, insufficient physical activity affects cancer significantly."

One of every six deaths in the world, the cause of death of one of every five in Turkey

Most common lung cancer in men, breast cancer in women. Turkey first lung cancer in men, breast cancer in women taking place. In men, prostate cancer is second in both Turkey and all over the world. In women, thyroid ranked second in Turkey in the world, had colon cancer.

Cancer is a Preventable Disease

Especially, using tobacco and tobacco products, obesity, insufficient physical activity significantly affect cancer. According to experts, when these causes are eliminated, cancer cases can be reduced by a third.

Early Diagnosis Saves Lives

Visit Cancer Early Diagnosis Screening and Training Centers and Family Health Centers!

- Mammography every 2 years for women aged 40-69
- Smear and HPV-DNA test every 5 years for 30-65 years old women
